🌐 [portfolio](#)

A passionate researcher, turned into a self-sufficient person during my PhD. Now I am enhancing my career towards Data Analysis using Python, SQL, APIs and I want to grow as a data analyst. Creating a good work environment through teamwork, motivation and empathy is amongst my main values.

PROFESSIONAL EXPERIENCE

July 2019 – February 2020

Postdoctoral

Research Unit of Santa Cristina Hospital/*Health Research Institute "Princesa"* (Madrid, Spain)

- Responsible for **several project lines**
- Experimental design and data analysis
- **Teaching and mentoring** activities and co-supervision of students

November 2011 – April 2019

Ph.D. student

Research Unit of Santa Cristina Hospital/*Autonomous University of Madrid (Spain)*

- Participation in the **EU Consortium** "EpoCan"
- **Writing** of original articles and reviews
- Award of fellowship for predoctoral contracts funded by the Ministry of Economy in Spain
- Publications

DATA ANALYST EXPERIENCE

Data cleaning

Data cleaning, wrangling and analysis techniques using **Pandas**, **Numpy** and **Matplotlib** libraries and **regex**.

Data pipelines

Pipeline generation to analyze a dataset based on parameters received through command **flags** in shell.

Geocoding

Use of **MongoDB**, **GeoJSON** points, **Folium** and **Google API** as the main tools to find the best location.

Image segmentation

Image processing through segmentation technique using **Numpy**, **Pillow** and **SciPy** libraries.

API development

Updating and recommendations using **NLP** from a database in **MongoDB** through an **API** by **HTML** requests.

Supervised ML for prediction

Algorithms of **supervised ML** for regression in **Scikit-learn** library and **H2O** AutoML function to predict prices.

DATA ANALYSIS PROJECT

May 2020

Diagnosis of MSI gastrointestinal tumors

Biopsy images preprocessing and classification into MSI and MSS tumors for predictions:

- **cv2** module to **preprocess** the images.
- Use of an instance in **Google Cloud** platform.
- Supervised **Machine Learning** for classification.
- Training of convolutional **Neural Networks**.
- **API** to predict new biopsy images from users.

EDUCATION

May 2020

Data Analytics Bootcamp *Ironhack (Madrid, Spain)*

April 2019

Ph.D. degree (*Cum laude*) *Autonomous University of Madrid (Spain)*

March 2013

Experiment design and analysis of variance *Health Research Institute "Princesa" (Madrid, Spain)*

June 2011

Master's in Molecular and Cellular Biology *Autonomous University of Madrid (Spain)*

July 2010

Bachelor's degree in Biotechnology *Pablo de Olavide University (Sevilla, Spain)*

KEY SKILLS

Language

- ✓ Spanish: Native
- ✓ English: Intermediate (B2 level)

Hard skills

Soft skills

- ✓ Teamwork
- ✓ Motivation
- ✓ Initiative
- ✓ Leadership
- ✓ Hard-working
